暖心一刻：黑猩猩母亲剖腹产两天后与宝宝团聚

文字稿

This is the moment a chimpanzee was reunited with her newborn.

这是黑猩猩妈妈和它的新生儿团聚的时刻。

Mahale the chimp gave birth via Caesarean section performed by two doctors.

这只名叫玛哈莉的黑猩猩通过剖腹产分娩，手术由两名医生主刀。

The baby chimp was struggling to get enough oxygen and had to receive treatment from the zoo's vet hospital.

黑猩猩宝宝出生后因缺氧在动物园的医院接受治疗。

Finally, he recovered enough to meet his mum.

黑猩猩宝宝恢复健康，终于可以见妈妈了。

At first, the mum didn't recognise her kin… until this.

一开始，黑猩猩妈妈并没有认出自己的儿子…… 直到下面这一刻……

"We're like: 'Good job, mama. You're such a good girl!'

"我们不由得感叹：'玛哈莉，你太棒了。真是好样的！'

And we all looked at each other and we're like: 'We're not crying. You're crying.'

我们都含泪对彼此说：'我们才没哭，是你在哭。'

And, you know, that was the best moment we could've hoped for. "

它们母子团聚如此温馨的场面真是再美好不过了。"

According to the zoo, both mother and son are doing amazingly well.

据动物园称，黑猩猩母子的健康状况都非常好。
